IN THE CLAIMS:

Please AMEND claims 1-6 as follows:

506 C1
1. (ONCE AMENDED) A consumer transaction facility for communicating with a host computer having a transaction information file for customers via a communication line in accordance with an operation of a customer to perform a customer's desired transaction, said consumer transaction facility comprising:

a display device;

display control means for controlling a display on said display device; and

input means for performing an input operation in accordance with a display on said display device, wherein said display control means performs on said display device a screen display in which a destination electronic mail address for receiving a transaction record of a [custom] customer is able to be [inputted] input through said input means, and a screen display providing options to the consumer to choose from, the options being to transmit the transaction record to the destination address, print the transaction record at said facility, and both transmit the receipt to the destination address and print it at said facility [a screen display in which it is selectable through said input means as to whether the transaction record is to be transmitted to the destination electronic mail address, and a screen display in which it is selectable through said input means as to whether the transaction record is to be issued in form of a sheet].

2. (ONCE AMENDED) A consumer transaction facility according to claim 1, wherein said display control means performs on said display device a screen display in which a number of transaction records including a new transaction record and past transaction records is able to be [inputted] input through said input means.

3. (ONCE AMENDED) A consumer transaction facility [for communicating with a host computer having a transaction information file for customers via a communication line in accordance with an operation of a customer to perform a customer's desired transaction, said consumer transaction facility comprising:

a display device; display control means for controlling a display on said display device; input means for performing an input operation in accordance with a display on said display device; and] according to claim 1, further comprising:

communication control means for controlling communications with the host computer,

wherein said display control means causes said display device to display transaction indications including a payment indication, and performs on said display device a screen display indicative [of a matter] that an electronic mail address for transmitting a transaction record is able to be registered,

wherein when the electronic mail address is [inputted] input through said input means in association with the screen display indicative [of a matter] that the electronic mail address is able to be registered, said communication control means transmits the [inputted] input electronic mail address via the communication line to said host computer so that the electronic mail address is registered in association with the transaction information file for customers,

wherein in the event that the electronic mail address is registered, when a transaction is performed through an operation of said input means in accordance with the transaction indications, said display control means performs on said display device a screen

display in which it is selectable through said input means as to whether the transaction record is to be transmitted to the registered electronic mail address or an electronic mail address other than the registered electronic mail address, and

wherein when a selection operation that the transaction record is to be transmitted to an electronic mail address other than the registered electronic mail address is made through said input means, said display control means performs on said display device a screen display in which a new destination electronic mail address for the transaction record is able to be [inputted] input through said input means.

AP 4. (ONCE AMENDED) A consumer transaction facility according to claim 3, wherein when said display control means performs on said display device a screen display in which it is selectable through said input means [as to] whether the transaction record is to be transmitted to the registered electronic mail address or an electronic mail address other than the registered electronic mail address, said display control means performs a screen display in which it is selectable through said input means [as to] whether the transaction record is to be issued in the form of a sheet.

5. (ONCE AMENDED) A consumer transaction facility according to claim 3, wherein said display control means performs on said display device a screen display in which a number of transaction records including a new transaction record and past transaction records [is] are able to be [inputted] input through said input means.

6. (ONCE AMENDED) A consumer transaction facility according to claim 4, wherein said display control means performs on said display device a screen display in which a number of transaction records including a new transaction record and past transaction records [is] are able to be [inputted] input through said input means.

Please ADD new claims 7-9 as follows:

- sub C2
7. (NEW) A consumer transaction facility, comprising:
a display device;
an input device enabling the consumer to perform transactions according to options displayed on said display device; and
a transaction receipt process displaying options on said display device to selectively receive a transaction receipt at a destination electronic mail address, to receive a transaction receipt as a paper receipt, and to receive a transaction receipt both at a destination electronic mail address and as a paper receipt.
8. (NEW) A method of performing transactions at a consumer transaction facility, comprising:
entering and storing a destination electronic mail address; and
selecting whether to receive a transaction receipt both at the destination electronic mail address and as a paper receipt.
9. (NEW) A method of performing transactions at a consumer transaction facility, comprising:
entering and storing a destination electronic mail address; and
providing options to receive a transaction receipt at the destination electronic mail address, as a paper receipt, or to receive a transaction receipt both at the destination electronic mail address and as a paper receipt.
